PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience designing and implementing scalable web and mobile applications. Expertise in React, React Native, Next.js, TypeScript, Node.js, and GraphQL. Proven track record of optimizing application performance, integrating complex APIs, and delivering high-quality code in agile environments. Strong background in frontend and backend development with MongoDB, PostgreSQL, and cloud technologies.

PROFESSIONAL EXPERIENCE

Full Stack Developer (Working Student)

Helden im Handwerk, Germany — Feb 2026 - Present

- Built type-safe backend services using Node.js and TypeScript with scalable APIs and relational data models in PostgreSQL.
- Developed full-stack features integrating React (TypeScript, Vite) frontends with backend APIs and efficient state management.
- Designed automation workflows using n8n, Docker, and AWS services (S3, EC2) for reliable deployments.

Full Stack Developer (Working Student)

PvFritz UG, Germany — Nov 2025 - Jan 2026

- Developed and enhanced user interfaces for production web applications using React, TypeScript, and modern frontend frameworks.
- Implemented responsive, accessible UI components following WCAG standards and mobile-first design principles.
- Collaborated in agile teams to deliver features aligned with business requirements.

Full Stack Developer

Drox Labs, Remote — Jan 2024 - Jun 2025

- Engineered cross-platform voice assistant using React Native, Node.js, and Python with ASR and LLM-powered NLP for real-time voice processing.
- Designed RESTful APIs and GraphQL endpoints to support mobile application features and data synchronization.
- Collaborated in agile sprints to ensure seamless frontend-backend integration and optimal user experience.

Full Stack Developer

BlockApex, Pakistan — Jun 2023 - Dec 2023

- Built a multi-chain cryptocurrency wallet browser extension using React.js, TypeScript, and Web3.js for EVM-based blockchains.
- Implemented secure wallet features including transaction signing, token swaps, NFT display, and private key encryption.
- Optimized bundle size by 40% through code splitting and lazy loading, improving initial load time significantly.

Full Stack Developer

Xord, Pakistan — Oct 2020 - Jun 2023

- Architected frontend for blockchain wallet with zkRollup and Layer 2 solutions, reducing gas fees by 28% and improving throughput by 3x.
- Integrated OpenCV and TensorFlow for facial recognition in an enterprise attendance system with 98% accuracy, processing 500+ employees daily.

KEY PROJECTS

Converso - Learning Management System

Next.js | TypeScript | Supabase | Clerk | VAPI | Tailwind CSS | Stripe

- Built a full-stack LMS with authentication, Stripe payment processing, and comprehensive course management.
- Implemented serverless architecture using Vercel and Supabase for scalable database operations and real-time sync.

Signalist - Stock Tracking Platform

Next.js | TypeScript | MongoDB | Inngest | Tailwind CSS

- Developed real-time stock tracking with personalized alerts, company analytics, and historical data visualization.
- Integrated financial APIs and background job processing via Inngest for automated price updates and notifications.

StoreIt - Cloud Storage Platform

Next.js | TypeScript | Appwrite | Tailwind CSS

- Created a cloud storage platform with file sharing, user management dashboard, and real-time device synchronization.
- Implemented secure file operations with role-based access control, encryption, and version history tracking.
